tinyurl.com/EPandSE

Environmental Progress & Sustainable Energy is a publication of the American Institute of Chemical Engineers (AIChE) reporting on critical issues of the environment, including remediation and treatment of solid or aqueous wastes, air pollution, sustainability, and sustainable energy. Published six times a year, each issue helps engineers and scientists stay on top of technological advances in all areas associated with the environment primarily through peer-reviewed technical manuscripts, short letters, or review articles.

- A publication of the American Institute of Chemical Engineers (AIChE), the world's leading organization for chemical engineering professionals
- Rigorous and quality peer review by a distinguished interdisciplinary editorial board helmed by Editor-in-Chief Martin Abraham
- Large international readership, with more than 120,000 full text downloads in 2018
- With Wiley Content Sharing, you can share a unique link to a full-text version of your article with unlimited people
- Fully compliant with funder requirements (Green and Gold Open Access options available)

Environmental Progress & Sustainable Energy publishes papers on all aspects of environmental concerns, sustainability and sustainable energy, with emphasis on system design, engineering solutions, and practical applications. Journal content is directed towards:

- Environmental management
- Regulatory response/instructional responsibilities
- Waste minimization
- Sustainability/Issues of sustainable energy
- Pollution prevention, "green" design and operation
- Integrated management of environmental and health and safety issues
